Add: 5785 Stonegate Hts # 5, Jamesville, NY 13078

EDUCATION

Syracuse University, College of Engineering & Computer Science

Ph.D. in Computer Science

Syracuse, US
Jul.2023 - 2028 (Expected)

Syracuse University, College of Engineering & Computer Science

Master in Computer Science

Syracuse, US
Aug.2021 - Jun.2023

South-Central University for Nationalities (SCUN), School of Computer Science

B.Eng. in Software Engineering (Experimental Class)

Wuhan, China
Sept. 2017 - Jun.2021

Honors and Awards: Triple-A Student, Student Scholarship, Excellent Student Leader, Prize for The Creative Working, First Prize in 2018 National Mathematical Modeling Contest (Hubei Province)

Teaching Assistant: Applied Nature Language Processing (25 Spring)

PUBLICATION

Li, X., **Yang, J.**, Chen, J., Tang, Y., & Gao, X. (2024, May). Characterizing Ethereum Upgradable Smart Contracts and Their Security Implications. In *Proceedings of the ACM on Web Conference 2024* (pp. 1847-1858). (**WWW 2024**)

RESEARCH&PROJECT EXPERIENCE

FullStack Security Lab, Syracuse University

Oct.2022 - present

Research Assistant on blockchain security, advised by Prof. Yuzhe Tang

- ◇ Conducted **static analysis** of smart contracts using **Slither**, identifying and mitigating vulnerabilities in decentralized applications..
- ◇ Tracked and analyzed Maximal Extractable Value (MEV) across decentralized exchanges over 1M USD, delivering insights to enhance transaction fairness and efficiency.
- ◇ Designed hands-on blockchain security labs, fostering practical skills in Ethereum smart contract analysis and implementation.

Seed Lab([SEED-emulator](#)), Syracuse University

Jan.2022 - May.2022

Participated in the improvement of seed-emulator, advised by Prof. Kevin Du

- ◇ Enhanced the SEED Emulator by adding lightweight blockchain functionality, improving simulation throughput for Ethereum PoW by 30%.
- ◇ Re-engineered the Dockerfile compilation strategy, reducing project build times by 26%
- ◇ Decoupled dependencies across modules, boosting system modularity and facilitating cross-team collaboration.

New Thread Lab, School of Computer Science, SCUN

Jun.2018 - Aug.2020

- ◇ Designed and developed an Anonymous Scoring System for the Academic Affairs Office using the **Spring** framework, ensuring user confidentiality and efficiency.
- ◇ Created official websites for the School of Economics and the School of Marxism using **Bootstrap** and **REST APIs**, enhancing accessibility and usability.
- ◇ Built multiple WeChat mini-programs with **JavaScript** and **Cloud API**, achieving over 10,000 cumulative visits.

WORKING&INTERNSHIP EXPERIENCE

IFLYTEK CO., LTD

Hefei, China

Position: Software Developer Intern, Work in Customer BG and Advised by Eng. Dongshen Qin

July 2019 - Aug.2019

Conducted the statistical analysis and processed the background data of the Kuyin APP

- ◇ Engineered data pipelines to process and analyze **user behavior metrics** for Kuyin APP, enhancing customer retention by 15%
- ◇ Applied machine learning models like AdaBoost and neural networks (Google **Magenta**) for audio synthesis.

KQ GEO TECHNOLOGIES CO., LTD

Wuhan, China

Position: Software Developer Intern, Wuhan Technology Center

Jan.2019 - Mar.2019

Software testing and optimization of the KQ GIS Android

- ◇ Used **LeakCanary** to detect memory leaks
- ◇ Optimized code to reduce **JVM GC(Garbage Collection)** times
- ◇ Added support for **VSYNC** to reduce screen tearing at high refresh rates
- ◇ Reduced Overdraw from the design of the UI to improve the app response speed

SKILLS

Programming Languages: Proficient in Java, Python, Solidity; Familiar with JavaScript (React, Vue, Node.js), SQL (MySQL, MongoDB), Matlab, Kotlin, and C

Tools & Frameworks: Spring, Maven, Flask, TensorFlow, Hadoop, Kubernetes, Docker, Git, Android Studio
